The Huangguoshu Waterfall is famous for its magnificence and grandeur, but compared to other world-famous waterfalls, it also has its unique and peculiar features. The most amazing feature is the naturally formed "**Water Curtain Cave**" hidden halfway up the waterfall, which runs through the entire waterfall, allowing visitors to have intimate contact with the waterfall. The "**Doupotang Waterfall**" is the widest waterfall in the Huangguoshu Waterfall Group. Doupotang Waterfall also has a special phenomenon: before each flood arrives, the waterfall makes a "rumbling" sound, hence its nickname "Howling Waterfall".
